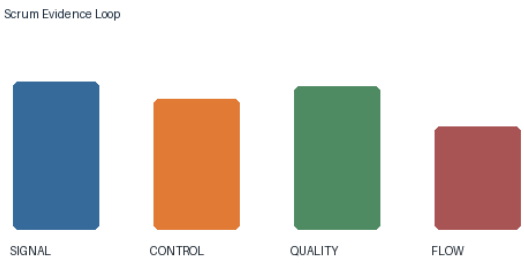
Northstar Delivery Office

# PROJECT METHOD PLAYBOOK

# SCRUM

## Scrum Product Delivery | synthetic baseline edition



# Contents

1. Delivery Intent

2. Product Scope

3. Sprint Mechanics

4. Release Learning Objectives

# 1 Delivery Intent

## 1.1 Evidence Inputs

Scrum teams align work to scrum product delivery goals and record evidence before advancing the work item.

- Review the signal before changing the plan
- Keep ownership visible across handoffs

| Stage | Evidence | Owner |
| --- | --- | --- |
| Frame | Baseline | Lead |
| Test | Outcome | Team |
| Learn | Decision | Sponsor |

# 2 Product Scope

## 2.1 Decision Rights

The Scrum method uses product scope to make the next decision observable and reversible.

Teams capture context, compare evidence, and assign a named owner for the next review.

# 3 Sprint Mechanics

## 3.1 Assurance Measures

Scrum records a measurable result for sprint mechanics and preserves the decision context.

| Check | Threshold |
| --- | --- |
| Trace | Evidence linked |
| Review | Owner assigned |
| Close | Action recorded |

# 4 Release Learning Objectives

A closeout record states what changed, who accepted the evidence, and what remains open in Scrum.
